ASSEMBLY

Mouth and Tongue:

Sew the tongue to the dark red piece attached to the top. Embroider with that color the tongue stripe.

Snout:

First you must prepare it to sew the piece of the mouth over it. For this, give shape by creating a central hole as you can see in the images. It will be there where you will sew the mouth for later, with light beige yarn, adjust the snout on it, folding the sides and forming the dimples.

Once you have the full snout, sew it matching the bottom to the neck line. Sew it on the bottom and sides, but for now you should leave the top part without sewing.

Eyes background:

Placing the background of the eyes is the reason why you have not sewn the top of the snout. You must place the last row of the bottom of the eyes under the snout.

Eyes:

Still without sewing the top of the snout, sew the eyes attached to the bottom of the background, in such a way that the white color is not seen from below.

They will be placed leaving 7 sc of separation from the top, in line with the upper slit of the background piece and leaving 3 sc of separation between them.

Now you can completely sew the **snout**. Take advantage to sink the dimples a bit by introducing the yarn and removing it by the other side.

Nose:

On the central protuberance of the snout, between the eyes.

Ears:

On round 8 of the head leaving 6 sc of separation from the eyes background in that round.

Feet:

Leaving 1 sc of separation from the final round of the body, joining the last 3 rounds of the feet to the body.

Arms:

In line with the ears leaving 2 sc of separation from the neck line.

ASSEMBLY

Beak background:

At the bottom sew it leaving 2 sc of separation from the neckline. In the upper part it will reach the round 17 approximately.

Beak bottom:

Place it on the background, matched to it by the bottom. Curve the sides to the middle of the beak background.

Tongue:

Sew it centered to the background with the pointed part facing down. Do it only from above, leaving the tip loose.

Beak top:

On top of the background, keeping the curved shape of this one.

On the sides it will reach the middle of the background, place where you will join it to the beak bottom and also form the dimples sinking the area with the same yarn. To do this, after sewing one of the sides, you will pass the yarn through the corner of the background, and remove it through the other corner carefully so as not to deform the doll's head. Repeat if necessary.

Eyes background:

Once the pupils are sewn, place the background of each eye in the gap of the beak background that you have kept when sewed the top of the beak.

Eyebrows:

Sew them over the eyes, keeping the curved shape of these.

Forehead tuft:

From the initial magic ring of the head towards the front, centered in relation to the eyes.

Hat:

Behind the forehead tuft. You must place it as shown in the images, that is, keeping the black band stretched. It will be centered and filled but not quite. Before sewing it completely you must shape it. To do this, with blue yarn form a division of the hat in 2 parts.

For this, introduce the yarn 4 sc below the initial magic ring of the hat and remove it from the bottom that you have not yet completely closed. Continue forming the division, but not horizontally, but following a sloping line so that the hat looks crooked. As you do so, you must ensure that the fiberfill moves towards the front of the hat, leaving the back more empty because of the division.

Bow tie:

Place it leaving 4 sc of separation from the neckline. Sew it by the central part.

Tail:

Centered on the back, attached to the edge of the jacket.

Feet:

Leaving 2 sc of separation from the final round of the body, placed open to the sides, joining the last 5 rounds to the body.

Arms:

In line in relation to the initial magic ring of the head, leaving 2 sc of separation from the neck line and 6 sc between them at back.

Scarf:

Sew it by the blue side to the neck line, between the arms.
